### **DISCLAIMER**

The design materials referred to in this document are based on the BeagleBone Black and are neither supported nor do they constitute a reference design. If you are looking for support, please join the BeagleBoard Community over at BeagleBoard.org/discuss.

There is no warranty for the design materials, to the extent permitted by applicable law. Except when otherwise stated in writing the copyright holders and/or other parties provide the design materials "as is" without warranty of any kind, either expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. The entire risk as to the quality and performance of the design materials is with you. In no event shall the authors or copyright holders be liable for any claim, damages or other liability, whether in an action of contract, tort or otherwise, arising from, out of or in connection with the design material or the use or other dealings in the design materials. Should the design materials prove defective, you assume the cost of all necessary servicing, repair or correction.

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user indemnifies BeagleCore from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge.

Except to the extent of the indemnity set forth above, neither party shall be liable to the other for any indirect, special, incidental, or consequential damages. BeagleCore currently deals

with a variety of customers for products, and therefore our arrangement with the user is not exclusive. BeagleCore™ assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or services described herein.

Please read the System Reference Manual and, specifically, the Warnings and Restrictions notice in the User's Guide prior to handling the product. This notice contains important safety information about temperatures and voltages.

#### INTRODUCTION

This document is the System Reference Manual for BeagleCore™ BCM1. It is intended as a guide to assist anyone purchasing or who are considering purchasing the board to understand the overall system design and the features of the BeagleCore™ BCM1. It can also be used as a reference for the design for those who are implementing this design into their own product.

This design is subject to change without notice as we will work to keep improving the design as the product matures.

This design is subject to change without notice as we will work to keep improving the design as the product matures.

# **KNOWN ISSUES**

For an up to date list of all known issues per revision, please refer to the BeagleCore GitHub repository and the issues listed there: <a href="https://github.com/BeagleCore/Hardware/issues">https://github.com/BeagleCore/Hardware/issues</a>.

#### 1. WHAT IS BEAGLECORE™?

The BeagleCore™ BCM1 is a miniaturized computer module for industrial or commercial applications covering all core features of BeagleBone Black. It is designed to address the Open Source Community, early adopters, and anyone interested in a low cost ARM Cortex A8 based processor. It enables users to design their own embedded devices while remaining a maximum compatibility with the BeagleBone Black.

## 2. FEATURES

This section covers the specifications of the BeagleCore™ BCM1.

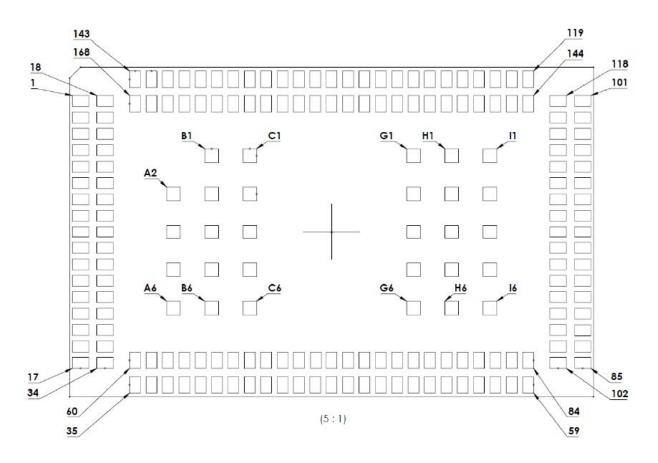

- Dimensions (WDH): 48 mm x 31 mm x 3,5 mm
- Processor: Texas Instruments AM335x Cortex-A8 "Sitara"
- Clock rate: 1.0GHz
- Memory: 512 MB DDR3
- Flash: 4 GB 8-bit eMMC
- Temperature range: 0...60°C (optionally: -40...85°C)
- Operating: 10 to 90% r. H. non cond.
   Storage: 5 to 95% r. H. non cond.
- Supported interfaces / extensions:
  - o 2 x LAN 10/100 Mbit
  - o 1 x USB 2.0 Host & Client
  - 1 x SDIO (for SD memory cards)
  - 1 x UART / 1 x JTAG (for debugging)
  - o up to 59 × GPIO for HDMI, CAN, I2C, etc.

# 3. SPECIFICATIONS

#### 3.1 PIN-SIGNALS GRAPHIC OVERVIEW

This section covers the pin-signals of the BeagleCore<sup>™</sup> BCM1 and provides descriptions of the major components and interfaces that make up the BeagleCore<sup>™</sup> BCM1.

# 4. CHANGE HISTORY

The following table reflects the changes made to BeagleCore™ BCM1.

Revision	Comments	Date	Editor
1.0	Original release	2016-03-07	ANS

# **5. OPEN HARDWARE**

BeagleCore<sup>™</sup> is built upon the Open Hardware Schematics of BeagleBone Black which has been created and published by the BeagleBoard.org Foundation. Just like the BeagleBone Black the BeagleCore<sup>™</sup> is published under Creative Commons (CC-BY-SA 3.0).
